

Choosy

Need: A pack of cards and counters (remove Jacks, Queens and Kings)

Shuffle the cards and place them in three piles, face up. Take turns to pick up any 2 of the three top cards. Add together. If the sum equals a number on the board, place a counter on it.

Put the two cards at the bottom of the piles.

You cannot put a counter on a square that has a counter on it.

The winner is the first player to make a row of four counters (vertical, horizontal or diagonal)

11	8	20	7	3	14
10	2	13	10	11	19
15	6	12	13	12	9
12	7	8	16	4	5
5	14	9	8	18	17
9	6	4	5	11	9
16	11	10	17	10	7
