

# Circle Add

## How to Play:

- Divide the class/group into equal teams. These two teams form circles.
- One person is chosen to begin the game and they are given 2 [3 dice for the more able].
- To start the game the dice are thrown and the “thrower” has to find the sum of the digits that appear on the dice.
- If a “thrower” is not sure of the answer they can ask a person who is directly alongside them to help them out.
- When the correct answer is given the dice are passed onto the person to the “thrower’s” right ... and so on until they have gone around the whole circle once/twice ...
- Once a team has finished they put up their hands ...
- The first team to raise their hands is the winner.

Die 1: 0, 1, 2, 3, 4, 5

Die 2: 4, 5, 6, 7, 8, 9
