

# Doubles

**Purpose:** To know and use double facts to 20

**Materials:** Each child has a 6 x 6 grid and a die marked 4 – 9.

**How to Play:**

EITHER

- Each child throws the die, double the score and write the total on their grid.
- Once the grid is filled, the children in the group take turns to roll the die, doubling the score and covering the number with a counter.
- The first to get four counters in a line is the winner.

OR

- The children throw the die, double the score and write the total on the grid.
- The teacher rolls a die, the children double the number and if the resulting sum appears on their grid they cover it with a counter.
- The first child to get four counters in a line is the winner.

12	14	8	16	10	18
14	12	8	14	16	10
12	14	18	8	16	8
12	8	16	8	12	12
8	18	16	14	10	10
10	18	12	18	16	10
