

HALF AND HALF

2 players

(dividing by two and four)

MATERIALS:

Each pair of players will need:

- A 'Half and Half' game board
- One set of numeral cards

Each player will need:

- 10 counters (each player a different colour)

HOW TO PLAY:

The aim is to arrange three counters adjacently in a horizontal, vertical, or diagonal line.

- The cards are shuffled and placed face down in a stack.
- The first player draws the top card and either halves the number or halves and halves it again to obtain an answer that is available on his or her game board.
- The player chooses and places a counter on the answer on the game board. If an odd number is drawn, the player misses a turn, as odd numbers cannot be halved or quartered to produce a whole number. If an answer is unavailable, the player also misses a turn.
- The card is returned to the bottom of the stack.
- The other player has a turn.
- The first player to make a line of three adjacent counters is the winner.

Half and Half
