

Make 10

Purpose:

To help your child to learn the addition number facts to 10.

Link to the Number Framework:

Number Facts, Stage 0-3

What you need:

- A pack of cards with the picture cards, jokers and tens removed. Ace is used as 1.

What to do:

- Deal out 10 cards in a row, face up.
- Players take turns to pick up 2 or more cards that add to 10. For example $3+7$, $2+3+5$, $2+1+4+3$, $3+1+6$.
- At the end of each player's turn, the cards they have removed are replaced from the deck.
- The game finishes when no further combinations can be found. The winner is the player with the greatest number of cards.

What to expect your child to do:

Be able to instantly recognise combinations of numbers that add to 10.

Variation:

Once your child is confident with the number facts to 10, choose a different target number. For example make all cards add to 12 or 15.
