

# Mystery Dice

You will need: 3 dice

- Player 1 throws the three dice and keeps them hidden.
- Player 1 adds up the total on the three dice. For example:  $2 + 4 + 5 = 11$ . They say the total out loud to other players.
- Player 1 takes away 1 dice and shows the remaining 2 to the other players. The other players must work out the value of the missing dice.
- Take turns to throw the dice.

## Versions

- Use two dice
- Use different dice (0–9 or 1–12)
- Multiply the three dice together
- Use cards instead of dice
- View the numbers on the dice as tenths—add or multiply.
